

Corporate Policy

Dr. Franz Feurstein Gesellschaft mbH, a member of delfortgroup, is innovation leader in development, production and distribution of special and functional papers of the core areas cigarette paper and flexible packaging. The success of the company is based on the values and duties of our code of conduct, which is binding for all employees.

- Production of premium, safe, legally compliant and papers in highest quality, based on solid processes, specific quality criteria and operational rules, which have to be followed by employees and visitors similarly
- Compliance of legal guidelines and regulations
- Compliance of the standard requirements of the integrated management system ISO 9001 / 14001 / 45001 / 50001 / BRC Packaging Materials in the valid versions and of all incurred contractual duties
- Continuous improvement and advancement of the whole company's productivity related to quality, product safety, work safety and health of employees, environment, energy and sustainable resources through strategy, target-setting and realization programs
- In collaboration with our employees and the representation of them we create safe and health suitable working conditions through elimination of dangers and minimization of risks for our employees as well as for leasing-staff and contractors
- Careful and responsible sourcing and environmentally friendly and energy-efficient use of resources, raw materials and services, where controllable over the whole production process, and in order to this also continuous improvement of the environmental situation and the energetic performance during simultaneous minimization of the environmental burden
- We admit to sustainable forestry and the requirements of international guidelines of the organizations FSC® (FSC-C109921) and PEFC™. We exclusively use pulp from woods, which
 - were harvested legally and derive from areas, in which traditional and civil rights are not violated
 - do not derive from forests, whose special conservation value is endangered by forest cultivation, or which were converted to plantations or from non-forestral use
 - do not derive from forests, which were planted with genetically modified tree species

We achieve that through the contribution of each and every well qualified employee, who is provided with regulated operational procedures, all necessary information and resources and who collaborates effectively and efficiently with his colleagues.
