thinprint publishing

delfort

OP polar bright®

the high luminescence paper for leaflets & inserts

benefits

- excellent folding performance for the most challenging folding patterns
- unmatched printed opacity for outstanding readability
- low ink consumption with exceptional print density
- optimized surface of the paper reduces the ink consumption
- safe solution for bar code reading
- cost efficient through more output per ton of paper
- lightweight paper means less pulp, lower weight, reduced transportation space, and less waste
- excellent printing and converting performance
- made from FSC™ and/or PEFC certified and controlled wood pulp (FSC-C111390, PEFC/08-33-0002)

features

- grammage range from 37 g/m² to 60 g/m² (23.5 lbs to 40 lbs)
- low bulk and well balanced stiffness
- high-bright bluish white shade
- luminescence above 10
- enhanced brightness and opacity
- printable in offset and inkjet
- high accuracy sheeting and format stability

applications

- high luminescence pharma and cosmetic leaflets
- technical manuals
