Tersil® face paper

high-quality labels with exceptional print

benefits

- ultra-low thickness without sacrificing readability
- brilliant print contrast, especially for multi-color print
- silky texture for high-end appearance
- cost-efficient through more output per ton of paper
- low ink consumption with exceptional print density
- outstanding abilities for lamination and die cutting
- performs smoothly in printing and converting processes
- made from FSC™ and/or PEFC certified and controlled wood pulp (FSC-C023027, PEFC/02 31-107)
- certified for direct food contact

features

- standard range from 28 g/m² to 67 g/m²
- available in coated or uncoated
- unmatched low thickness combined with outstanding opacity
- printable in offset, inkjet, flexo print, thermal transfer print, HP indigo and rotogravure
- works perfectly with hotmelt and acrylic adhesive
- available in white

applications

- various self-adhesive labelling applications
- food & beverage industry
- logistics labels
- household products
- pharmaceutical industry
- VIP labels

variants

- Tersil® Face Star Plus
- Tersil® Face Opaque
- Tersil® Face Vellum
